

Create Telegram Bot

Login to Telegram WEB on a browser:

Search for BotFather

Type: **/start** and then **/newbot**

Pick a Name for your Bot

I used : **YourFlixSonarrBot** (Create your own)

Pick a username for the bot

I used: **YourFlixSonarrBot_bot** (Create your own)

Invite your own bot into your own Support Group -Make sure bot has speak permissions

I need 2 things off you to give your Bot info as to when new Releases are added - see image below - I need the number in RED - PM me this

And

I need your Support Group Room number

Open the group in TG Web - you will see it in the browser:

<https://web.telegram.org/k/#-XXXXXXXXXXXX>

Done! Congratulations on your new bot. You will find it at t.me/YourFlixSonarr_Bot. You can now add a description, about section and profile picture for your bot, see [/help](#) for a list of commands. By the way, when you've finished creating your cool bot, ping our Bot Support if you want a better username for it. Just make sure the bot is fully operational before you do this.

Use this token to access the HTTP API:

Keep your token **secure** and **store it safely**, it can be used by anyone to control your bot.

For a description of the Bot API, see this page:

<https://core.telegram.org/bots/api>
