

**TICKET #IE314\_153**

**DECLARED - Item 6.2.B.5 from 2019 report remains open: It was not evident how the software change history of the FSTD can be determined through the IOS functionality.**

**ME**

This does not state that audio/graphics / signage etc at airports are never updated. We would need to be informed of any potential changes to airports. etc.  
Does the standard updated potentially effect the above?

**ALSIM**

The airport graphics are not updated through the database update tool. It can be done only on demand by the operator.

Thank-you for the confirmation - I will close again. Thanks. 

 **Souleymane SARRE (Alsim)** Jun 22, 2022, 11:32:37 AM

 The airport graphics are not updated through the database update tool. It can be done only on demand by the operator.

 **Michael SMITH** Jun 22, 2022, 11:20:02 AM

The software change history cannot be determined through the IOS. Whenever the software is updated, the operator receives a letter of change proposal (LCP) and a final Service Bulletin (SB) that must be presented to the authority at each evaluation (in case of minor change). In case of major change, the operator must get the authority's approval prior the update

This does not state that audio/graphics / signage etc at airports are never updated. We would need to be informed of any potential changes to airports. etc.
