

TICKET #IE314_197

QTG 2.c.ii.1a – Flap change dynamics during take-off (retraction) was run manually during the evaluation. The graphs for all toleranced items exceeded the tolerances when following the presented Manual Test Procedure instructions.

Jeffrey Alsim - 14-04-2024

Please submit any required changes to the manual instructions and we can remote login and update the description.

Michael 20-04-2023

Jeffrey - There are quite a few descriptions we would like to update and the plan was to run 2 or 3 manual QTG during each quarterly flyout and adjust as we go and update them all through time.

Is there a way I can manually update these myself and I understand that this will require a remastering with the Authority if I make any changes!

Jeffrey 28-04-2024

Michael, We are discussing internally and will revert back with a solution

Michael 28-04-2024

Thankyou Jeffrey - Would be much appreciated.
